

Přehled zásuvek

<p>Type A – used in, among others, North and Central America and Japan</p> 	<p>Type B – used in, among others, North and Central America and Japan</p> 
<p>Type C – used in all countries of Europe except the United Kingdom, Ireland, Cyprus and Malta</p> 	<p>Type D – used almost exclusively in India, Sri Lanka, Nepal and Namibia</p> 
<p>Type E – primarily used in France, Belgium, Poland, Slovakia, the Czech Republic, Tunisia and Morocco</p> 	<p>Type F – used in, among others, Germany, Austria, the Netherlands, Sweden, Norway, Finland, Portugal, Spain and Eastern Europe</p> 
<p>Type G – mainly used in the United Kingdom, Ireland, Cyprus, Malta, Malaysia, Singapore and Hong Kong</p> 	<p>Type H – used exclusively in Israel</p> 
<p>Type I – mainly used in Australia, New Zealand, Papua</p> 	<p>Type J – used almost exclusively in Switzerland and Liechtenstein</p> 
<p>Type K – used almost exclusively in Denmark and Greenland</p> 	<p>Type L – used almost exclusively in Italy and randomly found throughout North Africa</p> 
<p>Type M – used almost exclusively in South Africa, Swaziland and Lesotho</p> 	<p>* In Brazil there is no standard voltage. Most states use 127 V electricity (Acre, Amapá, Amazonas, Espírito Santo, Mato Grosso do Sul, Maranhão, Pará, Paraná, Rondônia, Roraima, Sergipe and Minas Gerais). Other – mainly northeastern – states are on 220 V (Alagoas, Brasília, Ceará, Mato Grosso, Goiás, Paraíba, Rio Grande do Norte, Santa Catarina and Tocantins). Although in most parts of the states of Bahia, São Paulo, Rio de Janeiro and Rio Grande do Sul 127 V is used, the cities of Santos, Jequié, Jundiá, São Bernardo do Campo, Novo Friburgo, Bagé, Caxias do Sul and Pelotas run on 220 V. The states of Pernambuco and Piauí use 220 V, except for the cities of Paulista and Teresina (127 V). ** Although the mains voltage in Japan is the same everywhere, the frequency differs from region to region. Eastern Japan uses predominantly 50 (Tokyo, Kawasaki, Sapporo, Yokohama, Sendai), whereas Western Japan prefers 60 (Osaka, Kyoto, Nagoya, Hiroshima). *** Saudi Arabia uses 110 V in many parts of the country, such as the Dammam and al-Khobar area (situated in the eastern province of Ash Sharqiyah). 220 V can be commonly found as well, especially in hotels. **** In Tahiti the frequency is 60, except for the Marquesas archipelago where it is 50.</p>
